

DURABAK

Safety Surface

Durabak is a tough, single-pack, totally flexible, slip resistant, waterproof protective polyurethane coating with self contained recycled rubber granules for a rough textured finish for indoor and outdoor applications.

Applications

Durabak will chemically bond to most clean and dry surfaces. The product can be applied by roller, brush or spray and give a relatively smooth to rough finish.

Durabak is suitable for many commercial/industrial and civil applications. The product protects surfaces from weathering and harsh chemicals while creating an anti-slip safe surface for pedestrians on:

- Pedestrian curb ramps and walkways
- Metal and wooden steps
- Car parks
- Vehicular ramps and loading docks
- Marine applications including ship decks (is specified by the US Navy)
- Pools and spas
- Many other applications.

With slip resistance AS 4586-R13. Durabak Colours come in standard colouring including, cream, light/dark grey, safety yellow, dark blue and black – Other colours are available upon request.
