

Safe-T-Stud[®]

Safety Surface Treatment.

PRODUCT DESCRIPTION

Safe-T-Stud is a new revolutionary surface treatment which consists of a multitude of discrete stainless steel studs designed to make floor surfaces safe from slips and falls.

Safe-T-Stud is a permanent solution designed to maintain a slip resistance of R11, even in the most extreme applications found in marine, schools, commercial kitchens, external ramps, and most other areas with hard surfaces.

Safe-T-Stud is design registered and manufactured from a single piece of 316 marine grade stainless steel for maximum strength and durability. Once installed Safe-T-Stud provides continuous safety and eliminates the need for other anti-slip treatments such as matting, making maintenance of the floor surface easier and safe.

DIMENSIONS

Safe-T-Studs have:

- a major diameter of 20mm, a minor diameter of 12mm
- a protrusion height of 2.8mm
- a tapered edge to ensure safe operation
- a 10mm long fixing spigot

PRODUCT RANGE

Safe-T-Studs are available installed at 50mm centres and can be self applied (DIY) using a simple template layout.

FEATURES

1. R11 anti-slip rated in Accordance with the Australian Standards AS4586
2. Provides a permanent anti-slip solution
3. Manufactured from 316 marine grade stainless steel to ensure long lasting maintenance free performance.
4. Resistant to heavy traffic abuse
5. Aesthetically pleasing without concealing the substrate or compromising on safety
6. Eliminates the need for matting
7. Suitable for food preparation areas
8. Low Maintenance easy to keep clean
9. Simple process for DIY applications
10. High chemical resistance
11. Extreme Low/High temperature resistance
12. Permanent, no need to re-apply

WARRANTY

Grip Guard provides a 10 year manufacturer's warranty, in accordance with our published warranty statement.

COMPLIES WITH

1. AS/NZS 4586:1999 Slip resistance classification for new pedestrian surface materials
